Yes No Echocardiogram (heart ultrasound) Date: Yes No Abnormal EKG
Yes No High Blood Pressure Yes No Heartburn/ Hiatus Hernia
Yes No High Cholesterol Yes No Thyroid Disease
Yes No Stroke -If Yes, Type: Yes No Diabetes
Yes No Gallbladder Disease Yes No Gallbladder Removed
Yes No Glaucoma-If Yes, Type: Yes No Alcohol or Drug Addiction
Yes No Tested positive for Hepatitis or HIV (information requested for administering injections)
Yes No Cancer If Yes, Type: Treatment: Remission:
Yes No Anxiety, Depression, Psychiatric Illness (If yes, please circle)
Yes No Seizure Disorder (History of Seizures)
Yes No Sleep Disorder If Yes, Type:
Yes No Eating Disorder If Yes, Type:
If female, Are you pregnant, nursing, or trying to get pregnant at this time? Yes No

Please list below all serious illnesses and hospitalizations you have experienced in adulthood.

Major Illness / Date / Treatment (if any)

List Major Surgeries (if any)

Year Year
Year Year

Any weight loss operations? Yes No If yes, type

Date of Surgery: Name of Surgeon: #'s Lost

Please sign below - The above information is true to the best of my knowledge.

\*\*Patient Signature: Date: Last 4 digits of SSN:

Physician Signature: Date:

**Please indicate if there is a Family History of:**

- Obesity       Diabetes       Kidney disease       High blood pressure       High blood cholesterol
- Heart disease       Breast cancer       Bleeding tendency or blood disorder
- Colon cancer       Lung disease, asthma or emphysema

**Additional Information:**

Please list all the physicians whose care you are under.

	Physician Name	Physician Location (city/state)
Primary Care	_____	_____
Gynecologist	_____	_____
Orthopedist	_____	_____
Other	_____	_____

**SOCIAL HISTORY**

Marital Status: Single: \_\_\_ Married: \_\_\_ Divorced: \_\_\_ Widow: \_\_\_  
 Number of Pregnancies: \_\_\_ Number of Children: \_\_\_ Ages of Children: \_\_\_\_\_  
 Smoking History: Never  Current  Packs per day? \_\_\_ How many years? \_\_\_  Former Smoker  Years Quit \_\_\_  
 Do you drink alcohol? Yes  No  Frequency of alcoholic beverages: Socially  Moderately  Heavy

**WEIGHT HISTORY** (Please estimate as closely as possible for all that applies to you.)

<u>Life Event</u>	<u>Age</u>	<u>Weight</u>
High School Graduation	_____	_____
Lowest Weight in Past 5 Years	_____	_____
Highest Weight in Past 5 Years	_____	_____

**Weight Loss Medications and/or Programs:**

Have you tried to lose weight in the past? Yes  No

Have you ever taken prescription weight loss medication in the past? Yes  No

If yes, Medication Name	Dates Taken	Prescribing Physician
_____	_____	_____
_____	_____	_____

If yes, did you lose weight on the medication? Yes  No  Pounds Lost? \_\_\_\_\_

If yes, any problems taking medication? \_\_\_\_\_

**Please circle all weight loss methods that apply:**

- Jenny Craig      Weight Watchers      Nutri-Systems      Acupuncture
- Opti/Medi Fast      Overeaters Anonymous      Nutritionist

List any other diets and/or weight loss attempts:

\_\_\_\_\_

**Patient Consent for Treatment:**

The following information concerns the purpose of our weight loss program and the risks associated with the medications used for treatment. Please read this information carefully. Ask any questions you may have prior to signing the consent for the treatment. Additionally, we recommend that you consult your primary care physician regarding this weight loss program and its effect on medications you may already be taking.

The purpose of our program is weight management through the use of dietary counseling paired with appetite suppressant medications. The medications are meant to aid in compliance with the reduction in caloric intake necessary for optimal weight loss. These medications are controlled, prescription medications; they are not without risk and may be habit forming. Because of these reasons, patients who are unable to lose an average of one pound per month after three months of medical therapy will be taken off the medication until the benefit of medication can be re-evaluated.

The primary appetite medications used for this program are phentermine (Adipex-P 37.5 mg, Ionamin 30mg., and generic), phentermine HCl (Lomaira 8mg), diethylpropion (Tenuate 25mg and 75 mg), benzphetamine (Didrex 50mg.), phendimetrazine (Bontril 35 mg and 105mg), \*Belviq (lorcaserin HCl) & Belviq XR, Contrave (naltrexone HCl/bupropion HCl) 8mg/90mg and Saxenda liraglutide (rDNA origin) injection pen. These medications have the same basic side effect profile including, but not limited to potential for the following: Dry mouth, nervousness, insomnia, headache, irritability, impotence or decreased libido, increased heart rate/heart palpitations, transient hair loss, dizziness, fatigue, nausea, constipation, increased blood pressure and dehydration which could cause kidney problems. \*Other side effects specific to Saxenda: possible thyroid tumors (including cancer), pancreatitis, gallbladder problems, and low blood sugar (hypoglycemia). \*Other medications may be prescribed at Doctor's discretion.

\*\*Detailed information for prescribed medication regarding possible side effects/adverse reactions may be provided upon request and/or provided by pharmacy filling prescription.

*These medications are not recommended for individuals with uncontrolled hypertension, hyperthyroidism, glaucoma, cardiovascular diseases, or advanced arteriosclerosis.*

Medication is prescribed strictly at the discretion of our physician. Our physician restricts the use of appetite suppressants for patients under 18 or over 70. Involvement in the program should not be construed as a guarantee of receiving medical therapy. Further, medications of a less restricted nature (i.e. phentermine and diethylpropion) will be used preferentially over more restricted medications (i.e. Didrex and phendimetrazine). Use of Didrex and phendimetrazine are restricted by state law to 12 weeks of therapy in a 12-month period.

I, \_\_\_\_\_, hereby acknowledge that I have read and understand the above information. I have been informed of the nature of this weight loss program and the potential side effects of the medications that may be prescribed to me. This consent shall remain in effect until revoked by me in writing.

**Patient Consent for Injections:**

Injections are offered as an option to our patients. They are pharmaceutical grade injections and have not been evaluated by the Food and Drug Administration. They will be given at the discretion of the physician and/or nurse. They include, but not limited to B12, Lipotropics, essential amino acids & supplemental injections.

The substances included in the injections occur naturally in the human body and diet. We have found these supplements to be helpful with energy and fat metabolism, but we make no guarantee of weight or fat loss with the injections. Further, we do not claim that they treat, prevent or cure any disease. We expect no adverse reactions. However, future research of injections could discover adverse side effects that are unknown at this time. Please discuss any concerns you may have about the injections with the nurse or physician.

*The injections are generally not to be given if you have had heart attack (MI) or a hemorrhagic (bleeding) stroke, or if you are pregnant or nursing. Please inform a Healthy Size staff member if you have had either of these conditions.*

The injections are given intramuscularly. Bruising is a normal potential side effect of intramuscular injections; it needs to be brought to the attention of the physician or nurse only if it occurs repeatedly. Swelling, infection, severe pain, and/or numbness and tingling are other potential side effects. These side effects should be brought to the attention of the physician or nurse immediately, should they occur.

I \_\_\_\_\_, hereby acknowledge that I have read and understand the above information and the potential side effects of these injections. This consent shall remain in effect until revoked by me in writing.
